Interim Village Manager, Daniel Schulze stated the proposed ordinance is being presented to the board of trustees as the advisory referendum was approved by voters at the consolidated election on April 1<sup>st</sup> to not continue to charge a fee to license a domestic pet in the village.

Mr. Schulze stated the proposed ordinance eliminates the fee charged to obtain a pet license (dog license) in the Village. Mr. Schulze stated the requirement to obtain a dog license is not being eliminated, only the fee is being eliminated. Mr. Schulze stated this is important because the failure to obtain a license and require a dog to be vaccinated against rabies as well as the ability of the village to penalize those found to harbor a dangerous or vicious dog needs to remain, as this part of the ordinance was recently updated.

Director of Public Works, Joe Caracci stated as part of the requirements of the USEPA approved Pretreatment Program the wastewater treatment plant must perform a local limits technical re-evaluation. Mr. Caracci stated the local limits are those that are applied at the end-of-pipe sampling locations prior to connection to the public sanitary sewer.

Mr. Caracci stated a technical re-evaluation is required by the NPDES permit to be conducted every 5 years. The technical re-evaluation includes:

- Identification of the pollutants that need to be evaluated based on regulations impacting the plant from the NPDES permit itself, EPA inhibition criteria, Illinois water quality based standards and Illinois or USEPA bio-solids limitations, and worker health and safety;
- Wastewater treatment plant and residential / commercial sampling to determine the removal capabilities of the wastewater treatment plant and the loadings contributed by residential and non-permitted commercial and industrial sources; and
- Obtaining plant operational data that can be used in the calculations of local limits.

Mr. Caracci stated the Local Limits re-evaluation was submitted to USEPA Region 5 and shall seek approval for adoption by the Village Board.

Mr. Caracci stated minor tweaks to the local limits are being recommended as they relate to: Cyanide, Nickel, Silver, and Zinc. Total Toxic Organics (TTO) are also being removed from the local limits.

Mr. Caracci stated staff has reviewed the Ordinance and is supportive of approval and incorporation.

Mr. Caracci stated a desiccant wheel is a vital component of a dehumidification system. Mr. Caracci stated the basic function is to transfer energy between fresh air and exhaust air in the system.

Mr. Caracci stated Munters is the sole proprietor vendor for the desiccant wheel. Mr. Caracci stated the life expectancy for a desiccant wheel is 10-12 years and the current one is 12 years old.

Mr. Caracci stated the wheel is not performing up to manufacturer's standards and needs to be replaced. Mr. Caracci stated proposed price of the wheel is \$37,050, staff included \$1,000 for shipping for the new total to be \$38,050. Mr. Caracci stated wheel installation will be performed by village staff.

**Resolution No.  
R-66-2025:**

10. President DeSimone gave the summarization of the action contemplated in **Resolution No. R-66-2025** entitled a **Resolution Authorizing the Execution of Extension #1 of the Construction Contract with Performance Pipelining, Inc. of Ottawa, IL for the 2025 Cured-in-Place-Pipe Sanitary Sewer Lining Project to in the Not-to-Exceed Amount of \$199,302.50.**

Mr. Caracci stated the Village's sanitary sewer collection system has several known locations that require rehabilitation and repair. Mr. Caracci stated the Department of Public Works has identified sanitary sewer locations where cured-in-place pipe (CIPP) sewer lining rehabilitation would be beneficial due to the following:

- The age of the existing pipe
- Existing pipe material
- Cracking in the pipe, which affects the pipe integrity long-term,

Mr. Caracci stated this procedure enables the installation of a new resin material within the existing pipe, creating a new pipe within a pipe without the need for costly and disruptive installation of a new sewer pipe and removing the need for pavement and turf restoration. Mr. Caracci stated the locations were chosen based on the age of the sanitary sewer, reported issues with the existing sewer, and the need to build on previous lining projects. Mr. Caracci stated the Village's 2025 CIPP Project will line sanitary collection systems in the Brentwood subdivision. along York Road, and a section at the end of South Center Street.

Mr. Caracci stated in May of 2024, the Village Board approved a contract for the Village's 2024 CIPP Project (R-91-2024).

Mr. Caracci stated the contract was a joint bid contract with the Village of Bartlett and the Village of Bensenville. Mr. Caracci stated the two Villages jointly solicited an MPI bid for cured-in-place-pipe (CIPP) lining for their sanitary sewer mains. Mr. Caracci stated Performance Pipelining, Inc. was the low bidder for the 2024 joint bid for both the total work and Bensenville's specific lining needs in 2024. Mr. Caracci stated the contract was a one-year contract with two one-year extensions. Mr. Caracci stated staff is recommending the exercise of one of the two contract extensions, as Performance Pipelining Inc. successfully completed the contract in 2024 and has imposed a minimal increase in the contract price of 1.35%.

Mr. Caracci stated village staff has identified the need to line 4,910 linear feet of 8" diameter sanitary sewer mains and 2,314 and to reinstate 93 service laterals on these segments of sewer mains.

Mr. Caracci stated construction oversight and project administration will be handled in-house by Village Staff for this project.

Mr. Caracci stated the Village successfully applied for a Surface Transportation Program (STP) grant in the amount of \$2,140,000 (\$1,850,000 for construction and \$290,000 for construction engineering) to reconstruct Green Street from Church Road to Mason Street and resurface Green Street from Mason Street to York Road. Mr. Caracci stated the project scope proposes to reconstruct Green Street in-kind between Church Road and Mason Street and resurface the roadway between Mason Street and York Road where recent streetscape improvements were completed in the Village downtown area.

Mr. Caracci stated within the resurfacing limits, spot curb and gutter improvements will be made, as necessary. Mr. Caracci stated ADA improvements will be made where existing sidewalks are not ADA-compliant. on-street bicycle accommodations along Green Street to connect to bike facilities at the project termini. Mr. Caracci stated the project also includes pavement striping, signage replacement, and landscape restoration.

Mr. Caracci stated Civiltech is currently wrapping up the Phase I design engineering services on this project and is ready to proceed to Phase II (detailed design). Mr. Caracci stated village staff feels very confident continuing with Civiltech for the Phase II design due to their excellent professional skills, knowledge, and staff capabilities.

Mr. Caracci stated the proposed Phase II scope consists of tasks which include the development and preparation of design plans and specifications, utility coordination, public outreach and involvement, permitting, bidding assistance, and land acquisition (as necessary).

Mr. Caracci stated after scoping meetings and negotiations, Civiltech's proposed work effort for this project totals \$654,238.35. Mr. Caracci stated this proposal includes \$298,786.35 in design services and \$355,452.00 in potential land acquisition costs. Mr. Caracci stated federally funded projects have to abide by rigorous federal requirements and deadlines to obtain approval. Mr. Caracci stated the requirements of federal process are similar regardless of the type, size or scope of the project. Mr. Caracci stated at this time staff has estimated the entire project cost at approximately \$5,800,000. Mr. Caracci stated based on this estimate the phase II design costs are approximately 5.5% which is within the typical range of 5-8% that we expect for phase II design costs.

Mr. Caracci stated the nature of the change order included balancing of contract quantities reflecting field conditions and four (4) additional items required during the project. Mr. Caracci stated the main issues that required this change order were due to adverse subsurface ground conditions. Mr. Caracci stated during the installation of the storm sewer near Jefferson and Marion, ground conditions were not good. Mr. Caracci stated extensive dewatering was required due to ground water conditions. Mr. Caracci stated as we were digging down to the depths required for the pipe, the earthen side walls continued to cave in. Mr. Caracci stated this required a much wider excavation than typically anticipated in order to safely install the pipe. Mr. Caracci stated the increase in width of the excavation also required additional bedding and backfill material. 15. President DeSimone gave the summarization of the action contemplated in **Resolution No. R-71-2025** entitled a **Resolution Approving the Village of Bensenville Qualification Based Selection (QBS) Policy and Procedures.**

Mr. Caracci stated Qualifications-Based Selection (QBS) is a procurement process where project owners select design professionals based on their qualifications and demonstrated competence, rather than solely on cost. Mr. Caracci stated it's a competitive process where firms submit qualifications, which are then evaluated and ranked, leading to a negotiation of the scope of work and fees with the top-ranked firm. Mr. Caracci stated QBS is often used in government projects and is mandated by the Brooks Act for federal agencies.

Mr. Caracci stated when the Village of Bensenville receives federal funds for consultant related engineering services, the Village must utilize Qualification Based Selection (QBS) procedures for consultant selection, in compliance with 23 CFR 172 and the Brooks Act. Mr. Caracci stated these procedures, adopted as policy by the Village, substantially follow Section 5-5 of the Illinois Department of Transportation (IDOT) Bureau of Local Roads and Streets (BLRS) Manual, and specifically Section 5-5.06(e) (Federal QBS Requirements), and therefore separate approval from IDOT is not required.

Mr. Caracci stated the Policy and Procedures presented identify Personnel Responsibilities, Public Notice Requirements, Review of Consultant Submittals Criteria, Contract Negotiation Rules, and Project Administration Assignments. Mr. Caracci stated this Policy and Procedures document will be used as a guideline for all consulting services for Village Projects. Mr. Caracci stated minor adjustments to the policy may be made to the policy and procedures based on the specific project or request.

Mr. Caracci stated staff is currently following these guidelines for our Engineering Short-list Request for Qualifications. Mr. Caracci stated staff also plans to use this QBS process for the upcoming Engineering selection for the York Road Underpass Design Services Contract later this summer.

Mr. Caracci stated this Policy has been sent to IDOT for review. Based on feedback from IDOT, we may make minor changes administratively.

Mr. Caracci stated if significant changes are recommended, we will bring back an amended Policy for Village Board consideration.

Mr. Finner stated the ice resurfacer was originally put into service at the Edge on John Street in 2003. Mr. Finner stated the hour meter indicates that it has performed 8.039 hours of service. Mr. Finner stated the vehicle is identified as a 2003 Olympia Millenium front dump ice resurfacer with the following serial number:
