Church Road Reconstruction Project Jefferson St to Grove Ave

DATE: 8/21/17

To the Residents:

Construction Work will be taking place in the vicinity of your home during the day tomorrow. The hours of construction operation will be between 7:00 am and 7:00 pm. Site conditions, weather, or nature of the work may necessitate occasional periods of work longer than the hours listed.

The work to take place at this time consists of:

Weather pending on 8/22/17 at 9:00am the Village of Bensenville Public Works Department will shut off your water so that new water main can be installed in the Church Road and Grove Road intersection. We expect that this work will take most of the day and your water will be turned back on by 4:00pm on 8/22/17.

Every effort will be made to allow you access to your property during the course of this work. There will be short periods of time where access will be difficult or restricted. If use of your vehicle(s) is anticipated during these hours, please have it relocated prior to start of work. We will do the best we can to restore the access by the end of each work day. Should you require immediate access to or egress from your property from a temporarily blocked driveway for special circumstances or for an emergency situation, please communicate with the resident engineer on site and access will be granted as quickly as possible.

If you have any questions about the work currently taking place near your home or the overall project schedule, please feel free to contact Darren Frawley at 630-660-6180. We thank you for your patience during the construction of this project.
