Re: October 30, 2024 FOIA Request

Dear Ms. Wilkinson:

I am pleased to help you with your October 30, 2024 Freedom of Information Act ("FOIA"). The Village of Bensenville received your request on October 30, 2024. You requested copies of the items indicated below:

*"See attached."*

After a search of Village files, the following information was found responsive to your request:

- 1) United States Fire Protection, Inc. Letter Dated November 3, 2008. (3 pgs.)

These are all the records found responsive to your request.

In regards underground/aboveground storage tanks and hazardous materials; please check with the Illinois Fire Marshal's Office to conduct a search of their files.

Do not hesitate to contact me if you have any questions or concerns in connection with this response.

Very truly yours,

  
Corey Williamsen  
Freedom of Information Officer  
Village of Bensenville

# VILLAGE OF BENSENVILLE FREEDOM OF INFORMATION ACT REQUEST FORM

TO: COREY WILLIAMSEN

Freedom of Information Officer  
Village of Bensenville  
12 S. Center Street  
Bensenville, IL 60106

FROM:

Name Alexandria Wilkinson, for EOI

Address 7733 Forsyth Blvd, Suite 1600

Clayton, MO 63105

Phone 573-944-4692

**Attn: Clerk, Planning/Zoning, Water/Sewer Departments, Fire Department**

Environmental Operations, Inc. is conducting a Phase I Environmental Site Assessment on a property located in Bensenville, DuPage County, Illinois. Under the Freedom of Information Act, we request any documents containing information, complaints, or environmental concerns (e.g., asbestos containing materials, polychlorinated biphenyls, hazardous materials or wastes use or release, petroleum product materials or wastes use or release, solid waste disposal, underground storage tanks, leaking underground storage tanks, air emissions, water emissions, industrial activities, etc.) your agency may have regarding this site and surrounding properties.

We are willing to pay up to \$25 for each site, however, if it goes above this amount, please contact us for approval before proceeding.

Re: 703 Foster  
Proposed Flammable / Combustible Liquid Storage Area

Thank you for taking the time to review the process by which Grane Transportation will be allowed to store flammable/combustible liquids at 703 Foster. I would like to confirm the following steps discussed with you in our 11/3/08 phone conversation.

- 1) Set up a preliminary meeting with Fire Safety Consultants to review what is being stored, how it is being stored, how much is being stored, where it is being stored and how to protect what is being stored. This meeting was held on September 19<sup>th</sup>. A copy of the minutes is attached. Fire Safety still needs all the MSDS sheets for the liquids to be stored at the facility.
- 2) Submit working drawings and calculations of the proposed fire protection system to Fire Safety Consultants for approval. It is my understanding from you that Fire Safety will be the only outside agency reviewing the fire protection system.
- 3) Submit working drawings, etc. for the 4 hr. wall separation and containment of the area. These documents will be reviewed in house by the building department and not by an outside agency.

From all the discussions, meetings, etc. thus far I understand it is the intent of Bensenville to allow Grane Transportation to store flammable/combustible liquids at 703 Foster. If any of the above is not your understanding and/or if there are any additional requirements necessary to complete this process, please contact me at your earliest convenience.

Thanks again,

  
Dave Eglsaer  
Vice President - Operations

Re: Flammable/Combustible Liquid Storage  
703 Foster Avenue, Bensenville, Illinois

The following is a recap of the items discussed in our recent meeting regarding the proposed flammable/combustible liquid storage at 703 Foster:

- 1) Providing a foam-water fire sprinkler system with a .6 gpm density over 3000 sq.ft. area for the above referenced storage area will be adequate to protect all Liquid Class IB, IC, II or IIIA commodities stored either as bulk or on slotted wood pallets to a height of 10'. No aerosol storage is allowed.
- 2) The liquids may be stored in either metal or plastic relieving style containers.
- 3) The container size may vary from 2 ½ gallon to 300 gallon.
- 4) The total volume of the storage cannot exceed 15,000 gallons and dispensing of any product would not be allowed from the facility.
- 5) The .6 density area would have to extend a minimum of 20' beyond the storage area, unless the storage area was enclosed with a fire rated separation. The fire rated separation is not required by NFPA standards, but may be required by Bensenville.
- 6) The foam would have be "ARF" (alcohol resistant foam). The amount of foam required would be determined by multiplying the density x the remote area x 3% x 15 minutes plus adding in the volume of the pipe. The owner has an existing 500 gallon foam tank and adding an additional tank to fulfill the required amount would be acceptable.

September 19, 2008 letter to Keith Frangiamore, contd.

- 7) The size of the containment area would be determined by multiplying the density x the size of the remote area x 90 minutes plus adding in the maximum volume of flammable/combustible storage that area could hold. The recess train dock would be acceptable, if it was of adequate size. The final decision of the containment area would be up to Bensenville.
- 8) 2 ½ inch hose stations off a separate supply should be provided at each man door.
- 9) A reduced pressure backflow preventer should be provided unless Bensenville waives that requirement.
- 10) You requested a copy of the MSDS sheets. In lieu of these sheets, I emailed Matt, the names of all the liquids along with their boiling and flash points. Please advise if this is acceptable.
- 11) Bensenville is also requiring changing the existing Siamese connection to a Stortz connection.
- 12) Your fee reviewing the plans and doing the inspections is \$1500.

Please review the above information. If you have any questions, comments, or corrections; please contact me as soon as possible.

Sincerely,

  
Dave Eglsaer
