## Re: Overhead Sewer Program

Dear Bensenville Resident:

The Village of Bensenville has established and funded a program to assist homeowners in incorporated Bensenville with the installation of an overhead sewer or backflow prevention device.

The program will reimburse the homeowner for 75% of the cost up to \$7,500 for overhead sewers and 75% of the cost up to \$750 for backflow prevention devices. Village building permits and inspections are required and approval by the Village is needed prior to any work commencing.

We have attached the brief application and summary of Program Requirements. Please take a few minutes to review the materials and feel free to call the Community & Economic Development Department at any time with questions you may have.

Very Truly Yours
